Summary

A BS Computer Science final year student with a specialization in Frontend Web Development along with a sound knowledge of software engineering fundamentals. Hands on experience in creating highly interactive and component driven user interfaces utilizing React.js, JavaScript, and CSS through hands-on internship experience and independent projects. Currently looking for an internship, junior developer position, or Software Engineer Intern role in frontend technologies.

EDUCATION

Shaheed Zulfiqar Ali Bhutto Institute of Science and Technology Islamabad

Feb 2023 - Feb 2027

Bachelor of Science in Computer Science

GBDC, Bhan Saeedabad

Sep 2020 - June 2022

Intermediate

TECHNICAL SKILLS

- **Languages:** JavaScript (ES6+), HTML5, CSS3, C++
- **Libraries & Frameworks:** React.js, Next.js, Bootstrap
- **Databases & Cloud:** MongoDB, NoSQL, PostgreSQL, Vercel, Render
- **Tools & Platforms:** Git, GitHub, Webpack, Figma
- **Methodologies & Concepts:** Agile, DSA, OOP, Software Architecture, CI/CD, Responsive Web Design, SDLC

EXPERIENCE

Software Engineer Intern

July 2025 – August 2025

FIDSOR Private Limited Islamabad, PK

- Constructed and created over 15+ functional web components via React.js and JavaScript, integrating good coding practices in practical layout design.
- Architected high-fidelity user interface and wireframe design in Figma to implement the design prototype in an effective front-end web architecture of 2 client websites.
- Created highly responsive designs for live applications of clients for effective layout, browser compatibility, and improved mobile-first experience, increasing cross-device responsiveness by 20%.

PROJECTS

MyAI Chat

React.js, Groq API

- Engineered an AI chat app with real-time streaming responses, markdown processing capability, multi conversation localStorage storage facility, and voice input/output via the Web Speech API using Groq API (Llama3.3).

MLSA SZABIST Website (Redesign)

React.js, JavaScript

- Redesigned the official website for the university's community into a new framework utilizing React.js component system, which included reformatting the 6 different page modules of the website to adhere to the official organization guidelines.

Cloud Integrated Secure IoT Gateway Simulator (FYP)

React.js, Node.js, PostgreSQL

- Designing a comprehensive IoT gateway dashboard that supports role-based authentication through JWT/bcrypt, anomaly detection for traffic, and an RDBMS schema using PostgreSQL tracking 5+ key system vulnerabilities.

Task Management Tool

React.js, Node.js

- Conceptualized a project tracker application with Next.js, secured RESTful CRUD API's using JWT middleware, and optimized cloud storage implementation successfully deployed on two different production workspaces of Render & Vercel respectively managing 100% cloud traffic.

CERTIFICATIONS

- **IBM Introduction to HTML, CSS, & JavaScript** [Coursera](#)
- **Introduction to AI** [Coursera](#)
- **Master AI for Web App Development** [Simplilearn](#)

CAMPUS INVOLVEMENT

Campus Ambassador

April 2026 – Present

AIESEC Islamabad, PK

- Built awareness and engagement on campus to motivate students by presenting global leadership possibilities and exchange programs to 50+ other students.
- Spearheaded promotions for 3+ key student events that contributed to increase in attendance by 25%.

Technical Coordinator

February 2026 – Present

MLSA SZABIST Core Team Islamabad, PK

- Led a team of 5+ developers in migrating the official MLSA campus website from JavaScript to React.js, guaranteeing improved modularity in the codebase and decreasing first-page load time by 30%.
- Managed the deployment of the website, making sure that the deployment process included version control and continuous integration using GitHub, having 100% uptime in the production environment.
